

# ODR™ LV

Omni-Directional Reconnaissance System for Light Vehicles

ODR PTZ Camera >

ODR LV Imaging Array >

Specially designed for light vehicles engaged in law enforcement, Anti-Terror, VIP Protection, Undercover, and Search & Rescue operations

You're driving into the unknown, watching out for the smallest details that might signal trouble. You have to keep your eyes ahead on the road, but problems could arise anywhere, from any side, and you don't have a moment to spare. In this crowded, urban environment, how can you identify and isolate the event you are looking for?

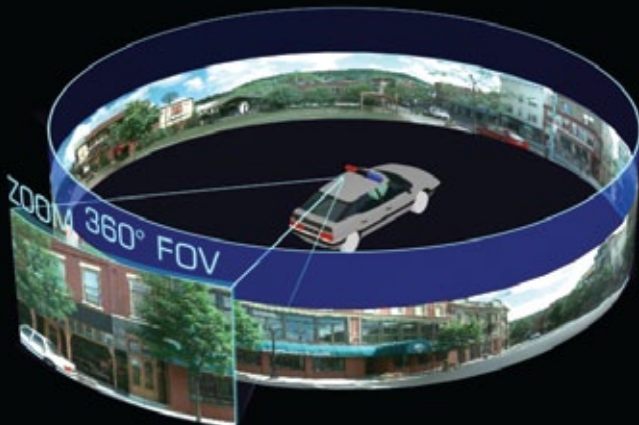

.....Just use the ODR system.....

The ODR LV System provides 360° Real Time, Continuous Panoramic View. ODR LV is easily mounted on any vehicle's roof. The system includes 2 external imaging arrays with 3 perimeter cameras each, Control and Display unit, and an optional Pan, Tilt and Zoom camera with NIR illumination.

Image manipulation software synthesizes the video stream into a 360°, easy-to-understand panoramic view. The display uses orientation indexes (marked 1 to 12), keeping the operator fully oriented. >>

ODR LV Touch Screen

- Crystal clear 360° Panoramic Video with an optional Pan, Tilt and Zoom camera
- Color cameras (turn automatically to B&W in low light conditions)
- Video Motion Detection (VMD) real time alert of threats
- Investigate, Record, Log, Playback, Debrief
- Lightweight, Mobile, Stand-alone

ODR. Bring the outside world, inside.

# ODR™ LV

## System Includes:

- 2 Imaging arrays with 3 cameras each
- PTZ camera (optional)
- Processing unit
- System computer
- Cables set
- ODF proprietary omni-directional software package
