Remington Technologies' Eye Ball™ R1 Takes Home the 2006 Innovation Award
The Eye Ball™ R1 is identified as the leading technological device designed to assist Law Enforcement and Military in their daily operations

Rockville, MD- October 16, 2006 – Remington Technologies is proud to Announce that the Eye Ball™ R1 won the prestigious 2006 Innovation Award in the Tactical Product Category. The announcement was made at the annual IACP

Show in Boston, MA recognizing the Eye Ball™ R1 as a truly revolutionary and valuable tool in facing law enforcement's ever-growing challenges. The Eye Ball™ R1 was judged by an independent panel of law enforcement professionals. The review criteria included innovation, Ease of use, cost effectiveness, quality distribution, maintainability and productivity improvements. Among all the products evaluated, The Eye Ball™ R1 excelled in all 6 categories, receiving the award for the best pioneering tactical device. "The Eye Ball™ R1 is the result of a true cooperation between Remington and the law enforcement and military teams who tested it. Special thanks to our partner, O.D.F. Optronics, who developed the Eye Ball™ R1, listened to our requirements and made the necessary innovations that allowed us to win this award. We are honored to have officers and soldiers around the world use the Eye Ball to keep their teams out of harm's way and to speedily diffuse tactical situations," says Asher Gendelman, Director of Remington Technologies.

The Eye Ball™ R1 is a toss-able 360° camera that can be rolled, dropped, mounted or lowered into virtually any hazardous scenario. Once placed into the area of interest, the Eye Ball™ R1 provides wireless audio and video for immediate insight. No matter if day or night, the Eye Ball™ R1's capabilities have proven to be invaluable for officers all over the world. Remington Technologies was established in 2004 as a new division of the Remington Arms, Co., Inc., one of the top US manufacturers well-known for its firearms, ammunition and related accessories. The Eye Ball™ R1 is the first product presented by Remington Technologies and marks the beginning of a new era of exclusive technologies designed to support Law Enforcement and Military in their every day operations. The Eye Ball™ R1 is developed and manufactured by O.D.F. Optronics, Tel-Aviv Israel.
